Press Release 9.21.21

As we continue to battle COVID-19, it's no secret that EMS and our hospitals are taking a beating from every angle. So, in an effort to maximize resources, ACEMS is strongly urging primary care physicians, nursing homes, clinics and practitioners of all levels to handle what they can in house by utilizing mobile diagnostics and other means before calling 911. By doing so, it will cut down on unnecessary trips to the ER, frees up resources for life saving emergencies, helps with overcrowding, and keeps vulnerable citizens out of our COVID filled emergency rooms.

ACEMS appreciates the cooperation from every provider as we all continue to provide the best care for our patients.
